

The Ultimate Acoustic Material for any Space®

## VHB INSTALLATION TAPE

### DESCRIPTION

17 mils scrim acrylic transfer adhesive specifically designed to meet the demanding end use bonding requirements where regular double coated tapes fail. This product is designed to ensure that the sealing bond is maintained even through exposure to water and a wide range of environmental conditions.

### APPLICATIONS

Use with ezoBord sheets or cut to size panels for a very fast bonding to walls or various substrates. Rolls have 160' of tape and it is suggested to use approx 30'- 40' per full sheet. For ceiling applications it is suggested to use ezoTape in combination with clear drying contractor grade adhesive ie "No More Nails".

### FEATURES

- Very easy unwind and removal of liner for ease of application
- Very high quick-stick
- Fast build up of adhesion
- Excellent holding power in all environmental conditions
- Excellent specific adhesion to plastic/PVC sheets, wood, brick, various types of plaster, metals, etc.

### TECHNICAL DATA

Thickness	17 mils
Liner	Kraft release liner
Adhesive Color	Transparent
Adhesion	100 oz./in.
Service temperature	-22° F to 176°F (-30°C to 80°C)
Holding Power	>24 hours
